

Monster Hunter Now — Rarity 6 break parts

Break the listed part for a chance at a Rarity 6 drop.

★ monster-exclusive R6 material — obtainable from this monster only (24 of 66). · Red = the break only counts under that condition (enraged, after roar, molten, 2nd break). · Purple = recommended weapons that come from this monster (a weapon needs its own monster's R6 material to grade up), blue = builds using its armour. A monster can be worth breaking for either. · Sever-only tails need a severing weapon (Great Sword, Long Sword, Switch Axe, Charge Blade, Insect Glaive, Dual Blades, Sword & Shield); blunt and shot damage will not cut them.

Odogaron	Forearms	—	—	no armour piece from this monster is in the current builds	
Teostra UNIQUE R6	Head (1 break)	—	—	no armour piece from this monster is in the current builds	

Break-part data from the user's "MHN Partbreaks" sheet, both views reconciled: all 66 monsters, every break part and every exclusivity flag now agree (the grouped view omits Fulgur Anjanath's asterisk; its row view marks Unique R6 = Y, which is the explicit field and the one used here). Grouped table credited to u/dora_teh_explorah, last updated 2026-06-17, sourced from mhn.quest & official MHN twitter/x. Armour piece names, slots, G10 skills and driftsmelt slots are from the official Monster Hunter Now client database. Velkhana supplies armour used in these builds but has no break row in either source table.
